E-LEARNING FOR EMERGENCY SERVICES

Especially in the times of the Coronavirus pandemic during which training services have been completely canceled for many aid organizations, an e-learning platform can save the day. Instead of on-site training, members get the chance to learn independently, digitally, and at their own pace.

RETTERAcademy is a customizable E-Learning platform for emergency services.

Numerous features make the RETTERAcademy the ideal addition to training and exercise services.

Find out more at www.retteracademy.com

Easy setup
Design your individual e-learning platform with your own courses for your aid organisation with just a few clicks.

Customisable
Design the academy according to your individual wishes. The logo, the color scheme, and the content are all customisable.

Easy administration
All courses can be made available to all users centrally. It only takes a few minutes to deliver content.

Certificates and quizzes
A customised certificate or a short quiz can be added to any course.

Also available as an app
All courses can be accessed on both a PC and a mobile device. Learning from the comfort of your couch – perfect for pandemic times.

Personal support
We are happy to help you set up your first RETTERAcademy course. You can easily get in touch with us any time if you have any questions or problems.
