THE LARGEST TRAINING EVENT IN TECHNICAL RESCUE

10.-13.10.2024 GÜSTROW, MECKLENBURG-VORPOMMERN

Following the great success of rescueDAYS 2023 at Bostalsee, the world's largest training event in technical accident rescue is travelling on to northern Germany.

We are guests in the Barlach town of Güstrow in the state of Mecklenburg-Western Pomerania. From 10 to 13 October, we will be organising rescueDAYS in cooperation with the Güstrow fire brigade on the grounds of the nationally renowned MC Güstrow.

In addition to the rescueDAYS ORIGINAL, our training programme again includes the rescueDAYS PLUS. Both training courses run for two days each. This means that all participants have the opportunity to take part in the rescueDAYS either on Thursday and Friday or on Saturday and Sunday. Participation in rescueDAYS PLUS does not require prior participation in rescueDAYS Original.

The events can be booked in German or English. In preparation, participants will receive a digital handout with the seminar content in advance.

A new addition to the training programme is the door opening seminar with expert Fabian Weiß (OPCON company). We offer the one-day seminar on all four days for 30 participants each.

The event is supported by the Minister of the Interior of Mecklenburg-Vorpommern, Mr. Christian Pegel.

Registration for participation in the rescueDAYS will be opened on 5 March at www.rescue-days.com.
