 **FEUERWEHR**
TAGE am Bostalsee

THE LARGEST TRAINING EVENT IN TECHNICAL RESCUE

21. - 24.09.2023 BOSTALSEE (SAARLAND)

After five years, the rescueDAYS return to the Bostalsee! For the first time in its twenty-year history, the world's largest training event in technical rescue will take place at the same location.

We will be hosting the rescueDAYS on the festival meadow directly by the lake from 21-24 September 2023 in cooperation with the district of St. Wendel.

In addition to the rescueDAYS ORIGINAL, we now have the rescueDAYS PLUS in our training programme. Both trainings run for two days each. This means that all participants have the opportunity to take part in the rescueDAYS either on Thursday and Friday or on Saturday and Sunday.

The events can be booked in German or English. In preparation for the training, participants will receive a digital handout with the training content.

In addition, the rescueDAYS symposium will once again take place on 22 and 23 September with a series of interesting lectures by renowned experts from the fire scene.

Parallel to the rescueDAYS, the Fire Brigade Days will take place for the fourth time with a exhibition covering more than 60,000 m².

The patron of the event is the Minister President of Saarland, Anke Rehlinger. An attractive supporting programme rounds off the event.

Registration for participation in the rescueDAYS will be opened on 08 May at www.rescue-days.com.
