GREETING WEBER RESCUE SYSTEMS

In accordance with our claim ‚Let’s create future‘, as an innovation leader in the field of rescue systems, training and cooperation with the users of our products is a matter close to our hearts.

This close exchange allows us to continuously adapt our products to new requirements. At the same time, the emergency services themselves are also required to keep their knowledge constantly up to date. After all, a successful rescue operation needs both: modern rescue equipment and people who can operate it optimally in the event of an emergency.

After having conducted the rescueDAYS digitally in the last two years, we are looking forward to being able to conduct intensive and instructive training days on site in direct exchange with our participants. Last but not least, the rescueDAYS are an experience that inspires through the practical work with the equipment and also the exchange of experiences among each other.

Bernhard Obermayr
Managing Director WEBER RESCUE SYSTEMS, WEBER-HYDRAULIK GMBH

GREETING FROM THE CITY OF PADERBORN

Dear Ladies and Gentlemen,

On behalf of the Council and the City Administration, I would like to welcome all participants of this year’s rescueDAYS to Paderborn.

I am very pleased that the world’s largest training event is taking place here in Paderborn this year and I am therefore very happy to have taken on the patronage for this event.

The Corona pandemic in particular has shown us how important it is to stand up for each other and show solidarity with our fellow human beings.

And who, if not our rescue and aid organisations, could set a better example here? Anyone who is willing to put their own health on the line every day to save others or prevent harm to them has my utmost respect. That’s why I think it’s extremely important that we continue to educate and train ourselves in these areas and see where we can become even better. I fully support this basic idea of the rescueDAYS and am proud that the city of Paderborn can be the venue this year.

Michael Dreier
Mayor City Paderborn

GREETING BY THE HEAD OF THE PADERBORN FIRE BRIGADE

Continuous training and further education is an essential prerequisite for us as fire brigades to meet our demands and the demands of the population for fast and professional help. This is a matter of course for both professional fire brigades and the more than 22,000 volunteer fire brigades in Germany. The large number of firefighters, most of whom work on a voluntary basis, ensures that rapid professional assistance is provided throughout Germany. This system is almost unique and we can be proud of it!

The fact that we are able to welcome participants from many European countries to the rescueDAYS in Paderborn shows how important the topic of further training is in the fire brigades. It also shows how important teamwork is for us and that national borders and nationalities are irrelevant. Take advantage of the event for training and further education, for exchanging ideas among yourselves and forging new friendships.

I am particularly pleased that the rescueDAYS have chosen the city of Paderborn for their start after the Corona break. With the venue at the ADAC test site, we have a modern and conveniently located area at our disposal. I wish you all a wonderful and exciting time at the rescueDAYS in Paderborn and welcome you to our friends.

Ludger Schmidt
Chief Fire Officer Paderborn Fire Department

Welcome to Paderborn!

Paderborn is not only geographically located in the middle of the Paderborner Land, the university city with more than 150,000 inhabitants is also the economic and cultural centre of an area that extends far beyond the borders of the Paderborner Land. Thanks to enormous development in recent decades, Paderborn today presents itself as a lively but still manageable large city with a high quality of life and great recreational value. Guests visiting Paderborn for the first time are often pleasantly surprised by the attractive city centre with its numerous sights, its romantic alleys, the attractive pedestrian zone and the 200 springs of the Pader, Germany's shortest river.

A real feast for the eyes is the former prince-bishop's residence, Schloss Neuhaus, with its baroque palace garden. Surrounded by a moat, the Weser Renaissance palace is the centre of the „Paderborn Palace Summer“ every year from May to October with a variety of events - this year including the rescueDAYS.

A PORTRAIT OF THE PADERBORN FIRE BRIGADE

The Paderborn Fire Brigade is a voluntary fire brigade with full-time staff and forms an independent department of the Paderborn city administration. Approximately 270 full-time colleagues and 400 members of the volunteer fire brigade are currently active in preventive and defensive fire protection and in rescue services in a total of 10 fire brigades. The full-time firefighters man the two fire and rescue stations, North and South, as well as the Schloss Neuhaus rescue station. A total of 39 functions are provided in 24 hours. In addition to the emergency service, the Paderborn Fire Brigade also runs a state-approved rescue service school, where about 30 emergency paramedics are currently being trained. In addition, the Paderborn Fire Department conducts basic group leader courses on behalf of the IDF. In 2021, a total of 15,561 RTW, 5,502 NEF, 5,502 KTW, 11,519 fire protection and 1,913 assistance missions were handled by the Paderborn Fire Department.

ARRIVAL

Arrival by car

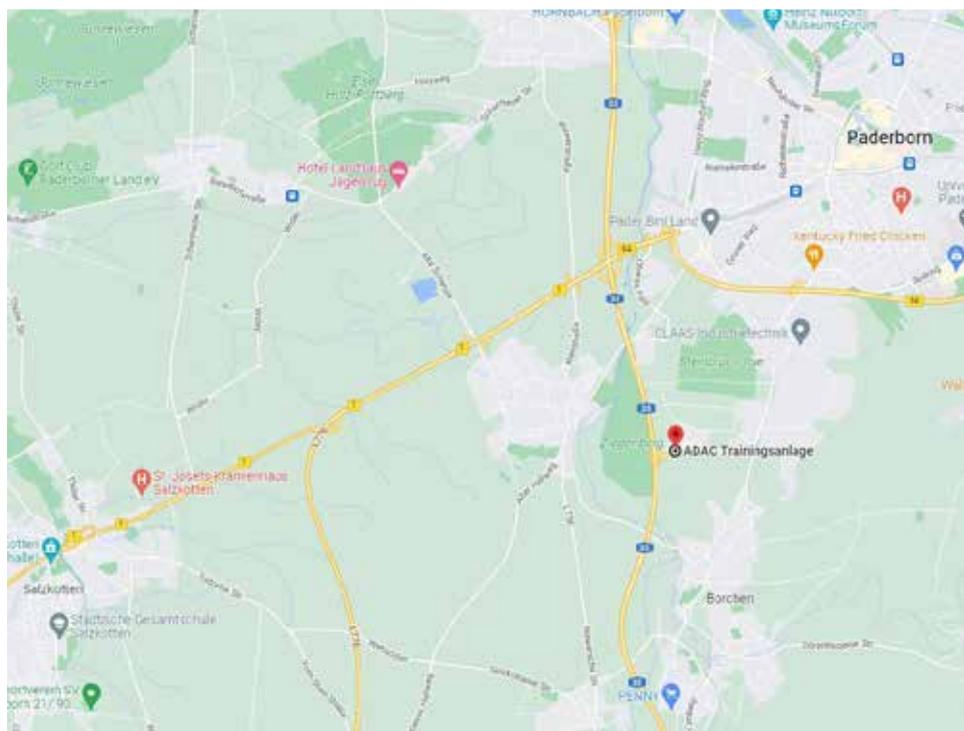

The ADAC driving training facility in Paderborn is conveniently located directly on the A 33 motorway. Address for the navigation system: ADAC Fahrtraining Paderborn, Borchener Strasse 34, 33106 Paderborn.

Arrival by train

From Paderborn main station take the R70 in the direction of Bo-Alfen Kirche. After 5 stops you will reach Pb-Mönkeloh, Buchenhof. From here it is a 1.2 km walk to the ADAC driving training center.

Arriving by plane

Choose Paderborn-Lippstatt airport as your destination. Alternatively, it is also possible to travel via Frankfurt or Hannover airports.

WORTH KNOWING AND IMPORTANT INFORMATION

Check-In	<p>Contact person: Pascal Weber</p> <p>The check-in is open at the following times:</p> <p>Wednesday 05.10. 05:00 - 06:00 pm</p> <p>Thursday 06.10. 07:00 - 08:00 am</p> <p>Friday 07.10 08:00 - 09:00 am 05:00 - 06:00 pm</p> <p>Saturday 08.10. 07:00 - 08:00 am</p> <p>To avoid waiting times, please check in early.</p> <p>Participants arriving the day before the event can check in the evening before between 05:00 and 06:00 pm</p>

BAR Albert Kreutmayr, BF Augsburg

02:20 - 02:40 pm Coffee break

LECTURE 7

02:40 - 03:15 pm Safety design of HV vehicles

Claire Petit Boulanger, Technical Center Renault

03:15 - 04:05 pm Demonstration chain rescue

WEBER RESCUE SYSTEMS

04:05 - 04:15 Closing discussion and farewell

A LOOK BACK: RESCUE DAYS 2019 IN MOSBACH

For four days, everything revolved around technical rescue on the grounds of the Training Center Retten und Helfen (TCRH) in Mosbach. In addition to the familiar training stations such as truck rescue, new vehicle technology or car on barrier, the approximately 700 participants were also able to practice at a completely new station - initial securing of building after traffic accident. Three different scenarios presented the firefighters with new challenges here, including rescuing an injured person from a car that was buried under a collapsed bridge.

„A great event with huge profit! Great exchange with others, fun factor also very big. Super to be allowed to practice on zero series vehicles as well. Many thanks!“, said one participant after the event on Sunday evening. Speaking of zero series vehicles: These were provided by Mercedes, Renault, BMW, VW and MAN.

After a break of several years, the rescueDAY symposium also took place again this year. Here, well-known representatives from the firefighting scene reported on their experiences in the areas of electromobility, modern vehicle technology and practical accident rescue.

The cooperation with the Neckar-Odenwald district fire brigade association and the TCRH, without which an event of this size would not be possible, worked excellently and contributed a great deal to the success of the event. A big thank you also goes to the many volunteers!

A LOOK AHEAD: RESCUE DAYS 2023 AT BOSTALSEE (SAARLAND)

In the middle of the Saar-Hunsrück Nature Park and on the edge of the Hunsrück-Hochwald National Park lies the Sankt Wendeler Land, one of the most beautiful regions in Saarland. The district of St. Wendel, located in the north of the state, consists of seven municipalities and the city of St. Wendel. The current population is around 88,500 and it has a total area of 476.12 km².

Already in 2018 we were allowed to accompany the rescueDAYS at the Bostalsee. The 120 hectare Bostalsee with its over 60,000 m² event area offers excellent conditions for the rescueDAYS 2023 as well. In addition to the training event, the Fire Brigade Days of the district will take place for the fourth time under the auspices of the Förderverein der Feuerwehren im Landkreis. In addition to the rescueDAYS, a trade fair with over 100 exhibitors will also be held at the same time.

The management conference of the Saarland with more than 300 participants with expert lectures will be held on Saturday in the large marquee. In addition to the fire departments of the district, THW, DRK, Malteser, DLRG, emergency medical services, the German Federal Armed Forces, state and federal police will also participate in the event and take advantage of the opportunity to present themselves.

We look forward to welcoming you to therescueDAYS 2023 at the Bostalsee.
